

Arch Bridge Design Competition

John M, Max N, Andrew H, Mason A

Design

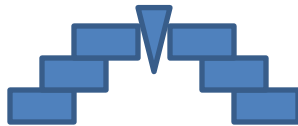

- What material you are using and why.

We are using foam blocks because they can be formed easily and they are light weight.

- Predicted score

We think we will get a score of 9.12 after some tests.

- Sketchup model if your team made one (or drawing,...)

Final Design

- Picture of final bridge
- Final measured score

Our final score was 7.2

Lessons Learned

- What would your team repeat (what you did correct)?
- What would you change if you did it again?
