

Wednesday Challenge Form

Group Members: ½ Of The Class and Me

Problem Statement: Transport a marble to the designated area with only cut pvc pipes and teamwork. We have to work together by eventually reaching our goal.

Approach: We had the team leader start us off, which might have been a mistake. It took us several tries to get it past the fourth person, but eventually we did it and finished. Sadly, we did not finish first.

Solution: We did not quite win, but we did do it the fastest than anyone else.

Lessons Learned: We learned that we needed to be kinder to each other and that we need to work together better.
